

Marine Technology Special Collection, Newcastle University, United Kingdom

Companies: Introduction

Definition: “A **company** is an association or collection of individuals. Company members share a common purpose and unite in order to focus their various talents and organize their collectively available skills or resources to achieve specific, declared goals. Typically an institution to conduct business such as a shipbuilding yard”. Based on Ref: Wikipedia
<https://en.wikipedia.org/wiki/Company> [accessed 06-04-2017]

Also **Search Collection** then **Shipbreaking, Shipbuilding, Shiprepairing,** and **Marine Engineering.** Also **Search Collection** then **Company Documents.**

Companies: Example Pages

- **British Shipbuilders Corporation, Newcastle upon Tyne, England, 1977 - 1989.**

Introduction: "The corporation was founded as a result of the Aircraft and Shipbuilding Industries Act 1977, which nationalised 27 major shipbuilding and marine engineering companies in Great Britain. A further 6 ship repair companies and a further shipyard were also acquired by the corporation, with British Shipbuilders initially comprising 32 shipyards, 6 marine engine works and 6 general engineering plants. Collectively, British Shipbuilders accounted for 97% of the UK's merchant shipbuilding capacity, 100% of its warship-building capacity, 100% of slow speed diesel engine manufacturing and approximately 50% of ship-repair capacity. Harland & Wolff, the only shipbuilder based in Northern Ireland was deemed to be a special political case and remained out of the control of the British Shipbuilders' management, despite it also being in state ownership from 1977". Ref: https://en.wikipedia.org/wiki/British_Shipbuilders [accessed 14-02-2017]

The Collection has various materials including BS product data sheets of ship designs, both actual and proposed.

- T. W. Ward of Sheffield
